

**SAGINAW VALLEY AMATEUR RADIO ASSOCIATION
PRESENTS**

DSP

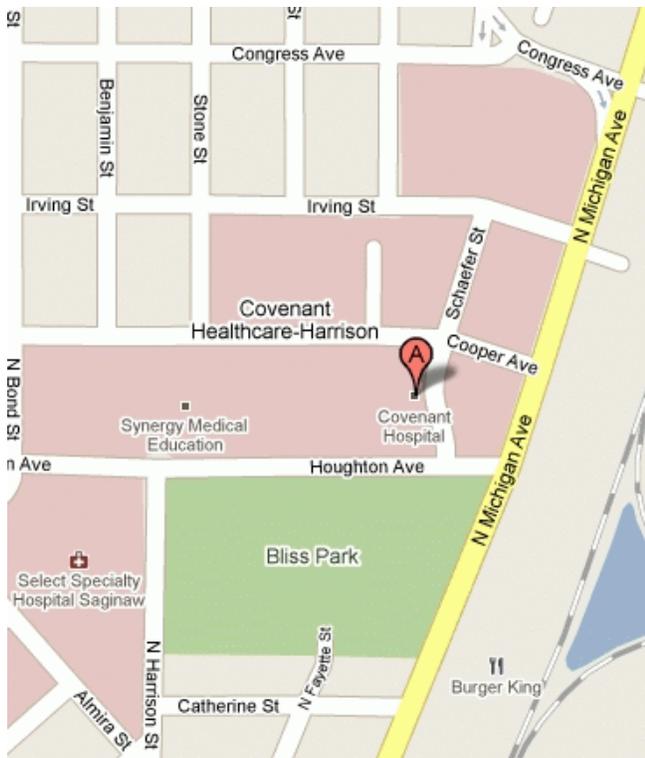

Digital Signal Processing

By John Ropar

"Have you noticed how everything is becoming digital these days -- DSP filters, DSP modems, DSP transceivers and more -- and for good reason. Digital representation of signals over their analog counterparts have many advantages. Digital Signal Processing is so pervasive in everything an amateur radio operator does and it is becoming an important tool." (TAPR)

Come join us for this special presentation by Pittsburg native **John Ropar**. John owned his own technical school for several years and was a Zenith electronic engineer. He has written several articles and lectured at many colleges. A Paratrooper in WW2, John was presented with a Purple Heart.

Location: Covenant Cooper Hospital
700 Cooper Ave, Saginaw, MI

Place: Lecture Theater

Date: Saturday August 21

Time: 2:00 PM
